A set of coherent and evolving indicators

With the B.I byBYG®, we provide laboratories with an open and automated tool allowing them to follow key production and quality indicators fully adapted to their needs.

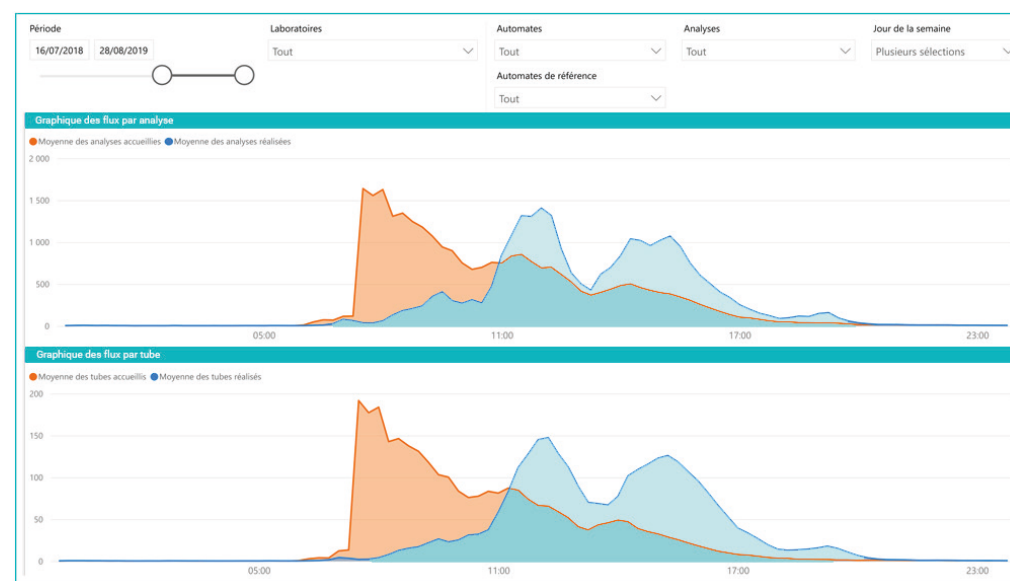

1 PRODUCTION INDICATORS

Ready-to-use indicators

- Workflow
- Turn Around Time (TAT)
- Validation rate
- Rerun Rate
- IQC rejection and alerts
- Use rate for expert rules
- Instrument uptime
- Cost per reportable
- ... / ...

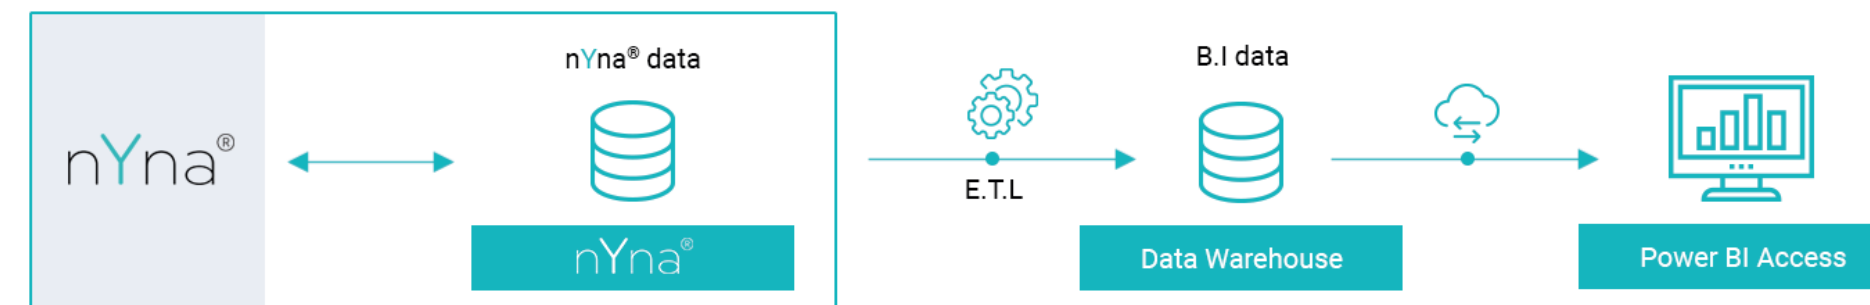

2 QUALITY INDICATORS

3 WORKLOAD INDICATORS

Open architecture

Saas or On-Premise offering :

- Use of an industrial ETL (Extract, Transform, Load) from Talend
- Hosting of the B.I database in the Cloud or locally
- Use of Microsoft® power B.I. for the visualization of indicators
- Access to indicators via a dedicated web portal
- Never penalizes the laboratory's production
