SUBMIT

- Compliance with ISO 22870:2016 and ISO 15189:2012
- Open to any POCT instrument, LIS and HIS
- Easy implementation of any POC instruments
- At-a-glance dashboard
- Simple web access from any browser
- Perfect integration with Yline® software suite

Major features of pocY®

Mapping of instruments

```

graph TD
    S1[SITE 1] --- E1[EMERGENCIES]
    S1 --- M1[MATERNITY]
    S2[SITE 2] --- E2[EMERGENCIES]
    S2 --- OR[OPERATING ROOM]
    E1 --- IA[Instr.A]
    E1 --- IB[Instr.B]
    E1 --- MC[Microm CRP.1]
    M1 --- IC[Instr.C]
    MC --- T1[At rest]
    MC --- T2[5 CQ Absents]
    MC --- T3[4 tasks to perform]
  
```

- Mapping and real-time control of POCT instruments
- All LIS/HIS connection protocols, including autocreation of requests
- Allows creation of questionnaires for initial and recurrent knowledge checks
- Global Operator certification dashboard
- Rule-based system for results validation
- Full QC package
- Remote access to instruments depending on the vendor protocol
- Integrated method validation module

Yline®

A UNIQUE AND INNOVATIVE
WEB-BASED ARCHITECTURE

CONTROL

RISK MANAGEMENT

COST EFFICIENCY

COMPLIANCE

The six pillars of BYG4lab®
